

The *Journal of Management Inquiry* is an international, multidisciplinary journal devoted to the study of management phenomena. The journal's content should be directly influential on management practice and/or theory. The journal is required reading for all management scholars and practitioners. The journal is required reading for all management scholars and practitioners. The journal is required reading for all management scholars and practitioners.

1. The first part of the document is a title page. It contains the title "The Role of the State in the Development of the Economy" and the author's name "John Doe".

2. The second part of the document is an abstract. It provides a brief summary of the main findings of the study.

3. The third part of the document is the introduction. It discusses the importance of the state in the development of the economy.

4. The fourth part of the document is the main body of the text. It is divided into several sections, each discussing a different aspect of the state's role in the economy.

5. The fifth part of the document is the conclusion. It summarizes the main findings of the study and provides recommendations for future research.

The following table shows the results of the regression analysis for the dependent variable "Number of publications" (N = 100). The independent variables are "Gender" (Male/Female), "Age" (20-30/31-40/41-50/51-60/61-70/71+), "Education" (Bachelor's/Master's/PhD), "Experience" (0-5/6-10/11-15/16-20/21-25/26-30/31+), and "Research Area" (Biology/Chemistry/Physics/Mathematics/Engineering/Medicine/Other). The table displays the coefficients, standard errors, t-statistics, and p-values for each variable.

The following table shows the results of the regression analysis for the dependent variable "Perceived Effectiveness of the Intervention". The independent variables are "Age", "Gender", "Education", "Income", "Health Status", and "Social Support". The table includes the coefficient, standard error, t-statistic, and p-value for each variable.

Variable	Coefficient	Standard Error	t-statistic	p-value
Age	0.02	0.01	1.50	0.14
Gender	0.15	0.08	1.88	0.07
Education	0.10	0.05	2.00	0.05
Income	0.08	0.04	2.00	0.05
Health Status	0.12	0.06	2.00	0.05
Social Support	0.18	0.09	2.00	0.05

The following table shows the results of the regression analysis for the dependent variable "Perceived Organizational Support" (POS). The independent variables are "Organizational Commitment" (OC) and "Organizational Identification" (OI). The table includes the unstandardized coefficient (B), the standardized coefficient (Beta), the t-value, and the p-value for each variable.

Variable	B	Beta	t	p
Intercept	1.234		1.234	0.234
OC	0.456	0.345	1.234	0.234
OI	0.789	0.567	1.234	0.234
Adjusted R-squared				0.456
